

# PHD-HUB FOULUM

**PHD-HUB FOULUM** is a program that allow you to connect with danish businesses, network with fellow scientists and graduates and find inspiration.

- The PHD HUB Foulum is a series of seminars focusing on bridging the gap between young scientists and local business related to the bioeconomy and food sectors
- Agro Business Park and Viborg Business Development Center can help in this matter
- The main activity is company visits organized once a month
- The program is targeted foreign Ph.d. students especially at AU Foulum but other students are welcome too

- Danish companies have a difficult time finding highly specialised labour
- More and more scientists and graduates will have to look beyond academia for a career
- Scientific research increasingly require business knowledge

## AGRO BUSINESS PARK

- A Danish Food and Bioeconomy Cluster that accelerate entrepreneurship related to agriculture, including food, energy and environmental technologies.

## VIBORG BUSINESS DEVELOPMENT CENTER:

The primary objective of the center is to contribute to growth and employment in the municipality of Viborg. This is created through more entrepreneurship, more cooperation, more knowledge and more exports.
